Project Details:

MINI PROJECT:
- **Securing Cloud Data Under Key Exposure**

  A pliable and most **secure** way to **secure** the **data** in the **cloud** severs
  for **cloud storage** is by using Ciphertext-Policy Attribute-Based Encryption (CP-ABE). But, in existing
  scheme the **secure key** distribution and verification is done by a single attribute authority which take a lot of
  time.

MAJOR PROJECT:
- **Online Food Order Web Application Using Python Flask Framework**

  The purpose of this project is to develop an Online Fast Food Restaurant Ordering System. It is a system
  that enable customer of fast food restaurant to place their order online at any time and any place. It provide a
  user-friendly web pages and effective advertising medium to the new product of the fast food restaurant to the
  customer with cheaper cost.
